## CREDIT AND TERMS

We are glad to extend credit on the basis of our regular terms to established nurserymen who are known to us, or are rated satisfactorily. Cash before shipment is required from parties unknown to us, who have no commercial rating.

Terms, 2% 10 days, 1% 30 days from date of invoice, 60 days net, unless otherwise arranged on acceptance of order. Interest at 6% will be charged on all accounts from due date.

## LIABILITY AND CLAIMS

We are not liable for injury to stock from frost, hail, fire or other causes beyond our control, and book all orders with this understanding. Errors made by us will be gladly corrected, but complaints must be made within ten days after receipt of stock.

Plants become your property upon delivery to transportation company, and we cannot be responsible for loss, damage, or delay in transit.

## PRICES

Prices are F.O.B. Kingston, N.J., and no boxing or packing charges will be made for stock in full carload lots.

PLEASE REPORT AT ONCE.

## NOTES IN EXPLANATION OF CATALOGUE

**¶** Boxed items call your particular attention to varieties on which we are offering especially attractive prices.

**¶** The figures following each variety, indicate in feet the approximate height of that plant when mature. It must be understood, however, that many varieties in their native habitat greatly exceed this height, but soil and climatic conditions modify their growth and character to a variable extent, and allowance for this has been made in the heights given here.

**¶** We recommend that all varieties marked with an asterisk be lifted with a ball of earth and burlapped. Experience has shown that the loss in these plants, which is otherwise high, is reduced to a minimum if handled in this way. This will involve an extra charge per plant, as follows:

2'-4', 20c    4'-6', 30c    6'-8', 40c    8'-10', 50c    10'-12', 60c

Larger sizes in proportion. In all instances where varieties are marked B. & B., these charges are included in the printed price.

## RESERVATIONS—SPECIMEN PLANTS

For an additional 25% customers will be permitted to select and reserve specimen plants in the nursery blocks for future delivery.

### NEW HARDY EVERGREEN BERBERIS

We have a good assortment of these new varieties which are very attractive in both dark green holly-like foliage and showy flowers. We consider this class of stock one of the most valuable additions to the broad leaved evergreens. As a class nearly all have large thorns, spined leaves, and color beautifully in the Winter months. Under favorable conditions most of them will attain a height of about six feet.

*gagnepaini*. Has long and very narrow holly-like leaf.

*julianae*. Fairly rapid growth with broader spined leaves.

*laevis*. Similar to *julianae*.

*sargentii*. Leaves very lightly spined, otherwise similar to *julianae* in habit.

*triacanthophora*. Rapid grower, dense habit and small, lightly spined leaves.

**JUNIPERUS EXCELSA STRICTA**

The spiny Greek Juniper combines regularity of shape, beauty of coloring, hardness and rather slow growth which makes it a gem for plantings of limited space. No more perfect plants can be found anywhere than these.

*Juniperus virginiana*—selected strain. Red cedars usually show many variations in type, but we have succeeded in producing a strain that has remarkable uniformity and a fine bluish color. For particular trade these plants are well worth the slight difference in price.
